Ghost Busters

A Haunted House Adventure

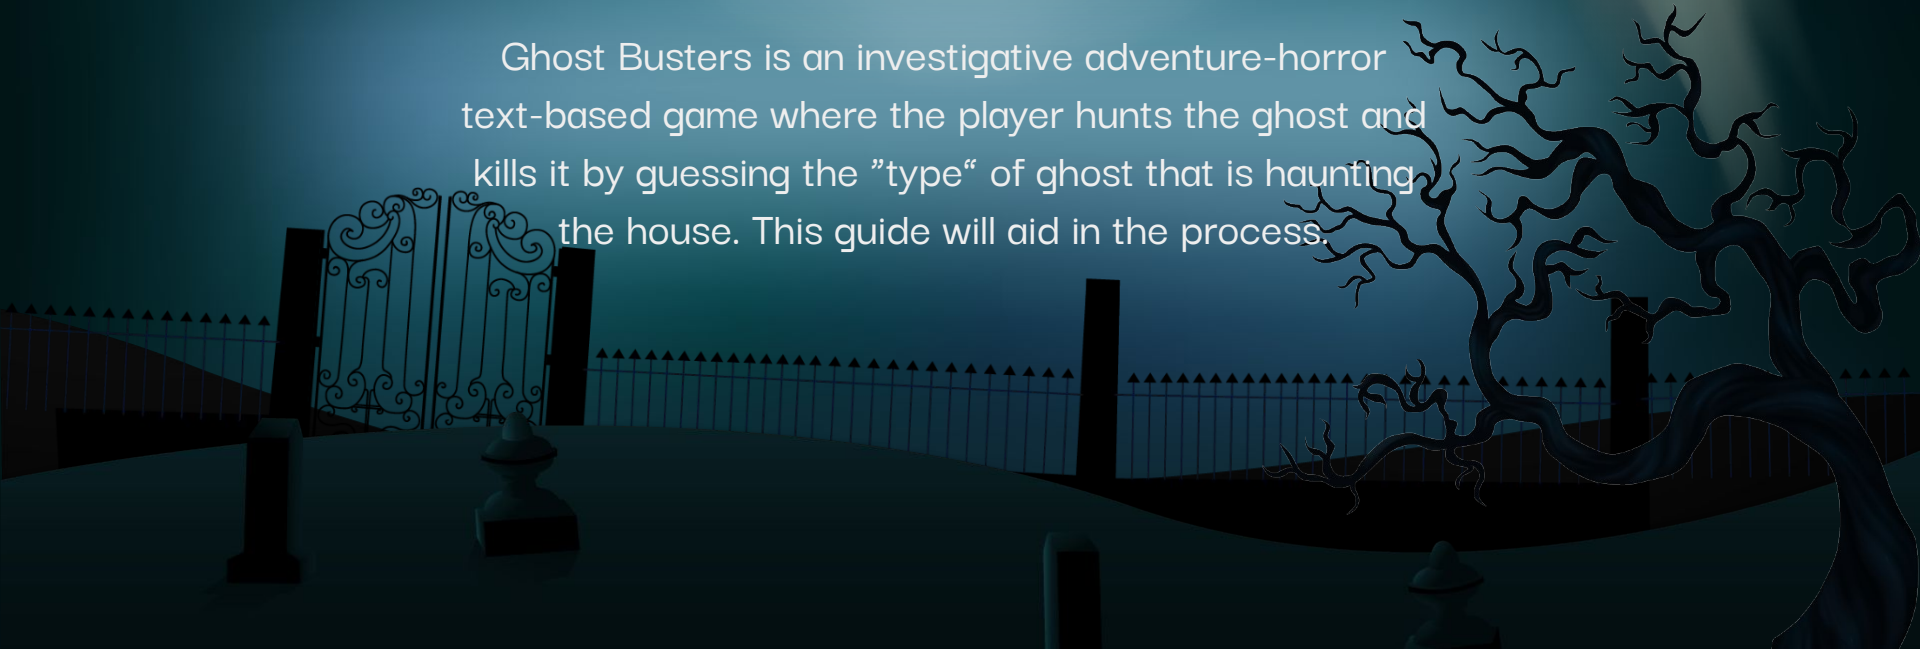

Anshul Mahajan & Ricky Foxell

For Ohjelmointi 1 (O1) at Aalto University, 2022

Introduction

Ghost Busters is an investigative adventure-horror text-based game where the player hunts the ghost and kills it by guessing the "type" of ghost that is haunting the house. This guide will aid in the process.

GhostBusting Premise

You are a ghostbuster!

You enter a haunted house. The goal of the game is to investigate the house and find the TYPE of the ghost that is haunting the house. Knowing the type of the ghost gives you power over it, hence you can kill it. (See: [External Doc](#)). You do that by using different tools called the "GhostBusting Apparatus" (find details on page #6).

You use tools in different rooms and find characteristics of the ghost (find details on page #7). To use tools and other commands, check page #5.

After you find one successful trait, you are met with a surprise from the ghost. Keep your eyes peeled 👁️.

Watch out for the turn count! You only get 20 turns.

GhostBusting Commands

Command	Syntax	Description
enter	enter <room name>	Used to enter a room. Find available rooms in the Description box.
get	get <item name>	Used to pick up an item.
use	use <item name>	Used to perform item specific actions.
install	install <item name>	Used to install camera or sound recorder in current room.
examine	examine <item name>	Used to examine action performed by camera or sound recorder.
inventory	inventory	Used to list inventory.
guess	guess <ghost type>	Used to guess the type of the ghost. You win or lose after this command. USE ONCE!
quit	quit	Used to quit the game. Imagine using this command, quitter!

GhostBusting Apparatus

Sound Recorder

If placed in a room, it will record sounds if a ghost enters the room.

Scanner

If used in a room, it will search for fingerprints on the floor.

Torch

If used in a room, it will search for bacteria stains on the floor.

Thermometer

If used in a room, it will measure the temperature of the room.

Camera

If placed in a room, it will click pictures if a ghost enters the room.

NB: The items only work depending on individual characteristics of the ghost.

Ghost Characteristics

	Fingerprints	Camera	Sound	Bacteria	Room Temperature
Inferno	x	x		x	Cold
Yeti		x		x	Hot
Nano	x		x		Hot
Demon		x	x	x	Normal
Spirit	x		x		Cold
Ultrghost	 x	 x	 x 	x	Normal

GhostBusting Walkthrough
